EXPERIENCE

Outgrowth Digital LLC | New York, Us | Co-Founder

APR 2020 – PRESENT, NEW YORK, NY

Responsible for Programming, Designing, Marketing & Finance.

- Optimized website performance through cloud hosting systems reducing company costs by up to \$240 per year. Developed ability to work with GNU/Linux servers via SSH, Gained fundamental skills in Python for back-end & JavaScript for front-end development.
- Reduced client expense by leading a team to develop an order management panel using Shopify API that saved a customer up to \$720 per year on subscription fees. Reduced WordPress plugin costs by writing custom CSS & JavaScript for styling and search queries feature.
- Optimize static files rendering times, refactored server configuration and employed custom CSS to replace bloated front-end frameworks: increasing page load time and SEO by up to 40%.

PROJECTS

Clubava | Private Worldwide Events (JavaScript, Python, & MySQL)

Designed front-end and graphics for simplistic user experience. Integrated MySQL database with Django to achieve data persistence. Managed the production of a QR-Code booking system with Stripe Payment integration. Set up Dokku implementation on EC2 for ease of deployment and maintenance.

Yemen Café & Restaurant (Django, Bootstrap & GSAP)

Demonstrated strong proficiency in Bootstrap CSS Framework & GSAP JavaScript animation library for delivery of responsive and fluent custom front-end. Optimized photos for fast page load times to improve SEO. Integrated JSON database for restaurant menu.

Hal & Al Meats | Graphic Design (Adobe Photoshop & Illustrator)

Lead design, development, and implementation of graphics illustration material for commercial packaging and marketing. Helped clients to reduce delivery time down by 4 weeks and cut costs up to 23%. Optimized layout for consistency and ease of communication with designers for future iterations.
