FRONTEND DEVELOPER | TRELLUS

May 2022 – Sept 2022

- Redesigned Admin pages in Figma while handling user data with React and Chakra
- Set up user event handling using Express, GraphQL and Apollo to track user subscriptions
- Managing consistent updates to the site every 2 weeks with Asana

WEB DEVELOPMENT PROJECTS

MY COOKBOOK | TYPESCRIPT, REACT, CHAKRA UI, SCSS, EXPRESS, NODEJS, MONGODB, FIGMA

- Full Stack web application deployed on Netlify rendering recipes by seeding my database from TheMealDB API
- Authorized Users can create cookbooks by choosing recipes. Users are authorized using JSON Web Tokens
- User and recipe data are stored in MongoDB Atlas while tokens are cached in localStorage
- Designed wireframes in Figma for inspiration before implementing designs into React with Chakra UI and Scss

MONO TRIVIA | JAVASCRIPT (ES6), HANDLEBARS, SASS, EXPRESS, NODEJS, MONGODB

- Trivia based generated quizzes using the Open Trivia API
- Users can sign up and sign in, authorized users can save test scores in MongoDB Atlas. Users are authorized using Express Sessions
- API was tested using Postman before rendering content into Handlebars and deploying to Heroku

JUMP | HTML5, CSS3, JAVASCRIPT (ES6)

- Responsive JavaScript parallax scrolling game with WASD keys for control
- Demonstration of my knowledge in Object Orientated Programming with JavaScript classes to perform frame-by-frame rendering
- With event listeners and modular imports I was able to generate different game states such as win and lose, collision detection, and animations
- Inspiration was drawn from the original Super Mario games
