## SUMMARY

As a recent Full-Stack Software Engineer graduate I have hands-on experience in a variety of disciplines including JavaScript and React.js framework, building custom API with help of Ruby(Rails) and making visual improvements with HTML and CSS. I prioritize completing tasks under pressure, meeting deadlines and doing daily performance reviews to exceed expectations. With over 5 years experience in management, I bring independence, resourcefulness and creative problem-solving to the software engineering field.

## TECHNICAL SKILLS

JavaScript, React.js, Ruby, Ruby on Rails, HTML, CSS, Bootstrap CSS, Version Control (GitHub), Object Oriented Programming, Troubleshoot, debugging, SQL, Sinatra

## TECHNICAL PROJECTS

### Travel Tracker - [Github](#)

Travel tracker is a start to finish project where the website uses both external and local API. **[Javascript, JSON]**

- Sourced the API data from public REST API to create realistic information and populate user-side data.
- Utilized local API to create a more interactive experience with the use of CRUD operators.

### FFS Logistics - [Github](#)

FFS Logistics is a start to finish full-stack project with a custom Sinatra API and React.js based front end. **[React.js, Sinatra, SQL, Ruby]**

- Developed API using Sinatra/Active Record for user login.
- Integrate software components into a fully functional software system.
- Making the website visually appealing with the help of Bootstrap CSS.
- Signup/Login features with the use of custom RAILS API.

### WhereToEat - [Github](#)

WhereToEat is a randomizer system, where users can find their next dining destination with just a click. It is a start to finish, full-stack project with the use of React.js as front end and Rails for custom API. **[React.js, Rails]**

- Implemented authentication with Rails Sessions including bcrypt for a more secure experience.
- Used Cookies and custom API to ensure persistence and a smooth flow while using the application.
- Utilized functional and class components in React.js to render the site dynamically based on user input.
- Responsive website made from scratch with the use of CSS.

## EXPERIENCE

### CoffeeCard

Front End Software Engineer(Intern)

New York, NY

10/2020

- Making functional web application with the use of **[React.js, Next.js, PHP, JQuery]**
- Making visual improvements with the help of **[Bootstrap CSS, FlexBox CSS]**
- Support project goals.
- Integrating APIs for the full end-to-end experience

### Starr Restaurants

Restaurant Manager

New York, NY

06/2022

- Improved training efficiency and depth for new and current employees by recreating a food study guide.
- Managed payroll and scheduling procedures with the implementation of extensive Excel automation scripts.
- Achieved 10% higher departmental sales with implementing sales scripts for all servers.

### Rosewood Hotels and Resorts

Food and Beverage Manager

Washington, DC

12/2019

- Improved departmental cost by implementing a more efficient floor plan and daily schedule.
- Collaborated and worked closely with other departments such as Events, where updated event menus and seating plan for different rooms to best accommodate different sizes of parties.

## EDUCATION

### Flatiron School

Full Stack Web Development, Ruby on Rails and JavaScript 15 week live program.

New York, NY

06/2022 – 10/2022

### University of Szeged

Associate Degree Hospitality Management

Szeged, Hungary

09/2008 – 06/2010
