EDUCATION

Bachelor's degree of computer science

Tohoku University

2011-2015

SKILLS

Frontend development

HTML5, CSS3, SCSS/SASS

Tailwind CSS, Styling framework

Javascript, jQuery, Typescript

React.js, Redux, Angular.js, Vue.js

Next.js, Nuxt.js

Web3, Ether.js

Backend development

Node.js, Express,

PHP, Laravel

GraphQL, RESTful APIs, Redis

Python, Django

Kevin Harrison

Senior Full Stack developer

Kevin is a professional Full Stack developer who specializes in frontend and backend.

Focused and detail-oriented offering exceptional troubleshooting skills.

Patient, Resourceful, Organized, Committed, Productive with excellent leadership and management skills.

Strives to build and improve tools and solutions to achieve repeatable quality results.

Quickly able to learn and master new technologies with proven success working in both team and self directed setting.

EXPERIENCE

Senior Full Stack developer

UltraHealth. (2021.07- 2022.09)

Developed the front end using Next.js/Redux and TypeScript based on a Sketch design.

Completed the integration between frontend and smart contracts using Web3 and Ether.js.

Developed smart contract generator using hardhat and Node.js and lots of NFT minting projects using that generator. Developed smart contracts for NFT marketplace and 2 Dex projects on EVM using Solidity.

Worked with a seasoned agile team that was made up of exports in all areas including front end, back end and DevOps. Developed with sound testing and debugging practices.

Developed a search engine to interact with MySQL, PostgreSQL, MongoDB and web interface using Express in Node.

Created technical documentation and well-commented code for open source consumption.

Used the Amazon Web Services(EC2, Lambda, Beanstalk, RDS, S3, Route 53...), GCP and Azure.

Implemented CI/CD for React.js, Next.js, Typescript frontend project and Node.js, PHP backend projects.

Planned, managed and tested frontend developer's work in team.

Database

MySQL, MongoDB, PostgreSQL

NoSQL

Devops

AWS, Github, Gitlab, Heroku, Vercel

Others

Excellent communication

Hard work

Flexible schedule and time zone

Power frontend team management

Language

English

Full Stack developer

Corvee. (2020.01-2021.03)

Code reviewed to achieve maintainable and high-quality code.

Fully tested components and redux-saga with Jest and fixed slow performance issues.

Created and extended the back-office REST API and created a new SPA based on React and Redux.

Implemented GraphQL Data Loader for PostgreSQL tables to reduce DB load.

Worked on transforming the product into a Progressive Web App to provide responsive UI/UX for mobile customers for increased core engagement and increase in time spent on site through mobile browsers.

Tracking and fixing the bugs, which were found during various

Did a application speed improvement and handled performance grow up using React Tech.

Created a compatible, custom user account dashboard using React.

Mern Stack developer

Feedzai. (2017.06-2019.08)

Involved in Unit, Integration and System Test and maintain application.

Worked with SASS that extends CSS with dynamic behavior.

Leveraging cloud services like GitHub, Heroku, AWS, Google App Engine.

Contributed to the evangelization of UI/UX best practices and code standards by encouraging a team culture focused on quality.

Implementing the UX approved layouts using Apollo-client. In Apollo client used React Js framework.

Used Axios, Fetch for http requests and attached Bearer token for secure usage of API.

Designed a REST API with a sub team of back-end developers.

Configured the project's Webpack build process.

Utilized GraphQL via Apollo Client to make queries to fetch from API, optimizing for developer-specific data from singular requests

Resolved bugs and functionality conflicts.

Implemented a PostgreSQL geospatial data model and nearby search.

Designed and built a chat server using Socket.IO.

Used AWS Lambda and AWS API Gateway to reduce costs from idle server time.

Worked with UX/UI design teams to improve existing applications and increase conversion

Debug the application using Firebug to traverse the documents and manipulated the Nodes using DOM and DOM functions.

Designed and built a chat server using Socket.IO.

Used AWS Lambda and AWS API Gateway to reduce costs from idle server time.

Worked with UX/UI design teams to improve existing applications and increase conversion

Debug the application using Firebug to traverse the documents and manipulated the Nodes using DOM and DOM functions.

Frontend developer

Nexon. (2015.06-2017.02)

Developed, tested, and maintained systems written in React and Node.js

Redesigned and remade old project built by AngularJS from ground using ReactJS

Responsible for installing, configuring and maintaining React, Laravel, PHP, Apache and MySQL on AWS cloud servers.

Collaborated with backend and client engineers to help build features and solve creative problems.

Developed landing pages for company using React Material UI

Involved designing in web pages using HTML5, CSS3, JavaScript, Angular.js, Bootstrap, SASS, SCSS, React.js, MongoDB

Implemented various screens for the front end using React.js and used various predefined components from NPM

Implemented stable React components and stand-alone functions to be added to any future pages.

Experienced in RESTful web services to integrate between Server side to Client side.

Created interactive and user friendly UIs using Next.js and Typescript.

Designed, analyzed and developed full-stack applications across multiple platforms using modern industry- adopted languages and frameworks.

Used React.js in components like JSX, created React Functional components, Virtual DOM, React Props, Lifecycle methods, worked with React States and Events.

Utilized Jest and Enzyme for front-end unit testing.

Updated the website from time to time for special Requirements using Angular.js.
