Portfolio

GitHub

Skills

Languages: JavaScript, Java, Python, TypeScript, C++, Go, C, C#, Kotlin, Ruby, GraphQL

Technologies: **React.js, Next.js, Angular, React Native,** Redux, Nest.js, Node.js, Express.js, Flask, Spring, PostgreSQL, MongoDB, Material UI, Gatsby, HTML/CSS, Tailwind, Git, Docker, Heroku, Apollo, GCS, AWS, Strapi, Redis, Grafana, Prometheus, VueJS, Kubernetes, gRPC, REST, Jira, Prisma, Linux, Nginx, Sass, Bootstrap

- Experienced software developer with a background of building scalable systems
- Software & System design, analysis and programming skills
- Able to create Full-Stack Apps for websites and Mobile
- Knowledge of public/private cloud computing technologies
- Self-motivated, collaborative, and diligent work ethic
- Proficient in developing Continuous Integration/ Delivery pipelines
- General knowledge of system management best practices
- Running test cases and debugging

Professional Experience

ContentWise BVBA

2/22-

Berchem, Belgium

Full-Stack Software Developer

- I worked on the backend, created Sequelize schema for the PostgreSQL database with MVC pattern in Node.js, Express.js.
- I built FrontEnd Apps using React.js, Next.js, React Admin and with other various technologies.
- DevOps and Cloud Computing, I've maintained Server scalability with Grafana, Prometheus, Also did data visualizations using Highcharts.

AppsDelivered Inc

9/21-

St Petersburg, Florida

Software Developer

- I worked as a Cloud Jira Developer in Atlassian Marketplace.
- I built Web apps using React, NodeJS with the Forge API.

Projects

Next.js Blog

[Link](#)

- A complete blog platform. Built using Strapi for the backend and Next.js for the frontend. I made use of PostgreSQL as a database. Additionally, it is mobile-friendly and responsive. The content is refreshed every 10 seconds. Hosted by Vercel and Heroku.

Amazon Data Scraper/API

[Link](#)

- With the help of this API, you can easily get all the JSON-formatted product information you require from Amazon.com. Such as Product Information, Current Price, Sales Rank, and Review Information.

React Music Player

[Link](#)

- A Music Player built with React and used SASS for styling. It shows an image of the song when it's playing, The slider also changes its color based on the song you are playing. It also works on Mobile and Tablet.

Video Chat App

[Link](#)

- React Video Chat Application Using WebRTC, this application, like Zoom, allows you to video chat with your friends and colleagues.

Certificates

- **HackerRank:** JavaScript (Basic) Certificate, JavaScript (Intermediate) Certificate, React Certificate, SQL Certificate
- **FreeCodeCamp:** JavaScript Algorithms and Data Structures.
- **AmigosCode:** JavaScript Mastery, Java Essentials, Fullstack Spring Boot
- **CodeDamn:** Next.js, Node.js, MongoDB Authentication.

Courses

Harvard X

- **Courses:** Harvard University CS50's Introduction to Computer Science, Harvard University CS50's Web Programming with Python and JavaScript.

University of Bonn

- **Courses:** Modern C++ for Computer Vision and Image Processing.

Full-stack Open

- **Courses:** Full Stack Development

FreeCodeCamp

- **Courses:** Responsive Web Design, JavaScript Algorithms and Data Structures.

Princeton/Stanford/Coursera

- **Courses:** Stanford Algorithms Part 1 and Part 2, Algorithms Specialization.

CodeDamn

- **Courses:** Advanced NodeJS, Next.js, Node.js, MongoDB Authentication.

Scrimba

- **Courses:** Learning React, Advanced React, Build reusable React,
