Google (Intern)—Frontend Developer

July 2014 - January 2015

Frontend Developer for Angular/React:

- MEAN/MERN Stack Frontend Development
- Backend/API Integration
- HTML/CSS/Javascript
- Ionic/React Native Hybrid Mobile App

Recent Projects

- VrayInc | C#, PHP, Python, Azure, MSSQL, Backend

<https://www.vrayinc.com/>

Vray is a custom payment gateway like Stripe. Vray is a mobile wallet gateway that enables any online merchant to accept payments from whichever mobile wallet is preferred by their customer.

I worked as a backend developer on this project. I build backend and APIs. Also I worked on a custom shopify app and woocommerce plugin for this payment gateway.

- Oxiwear | React Native(iOS/Android app), React.js, Node.js/Express.js, AWS, PostgreSQL

<https://oxiwear.com/our-team/>

Oxiwear is a wearable device to detect oxygen score. I worked as a lead developer for a mobile app (iOS and Android) and an admin panel for both users and doctors. I worked on devOps also. I configured many AWS components and whole server structure.

- Rayka | React Native(iOS/Android app), Ruby on Rails, Heroku

<https://play.google.com/store/apps/details?id=com.whimsocial>

<https://apps.apple.com/us/app/whim-social-discover-nearby/id1500534474>

Rayka is the social mobile app and I worked on backend APIs with Ruby and also frontend upgrade with React Native for both iOS and Android app development.

- Bridestory | React Frontend

<https://www.bridestory.com>

Bridestory is an inspiring and resourceful online global wedding directory and marketplace that helps to connect

wedding professionals and vendors with engaged couples around the world.

The front-end of the site is built with React and uses Webpack for bundling codes.

- HappyFresh | React Frontend/Ruby on Rails Backend

<https://www.happyfresh.my>

HappyFresh is an online shopping site that lets you shop all your favorite products from grocery stores around the city at the tap of a button.

The front-end of the site is built with React.

- KPI Fire | MEAN Stack

<http://www.kpifire.com>

A cloud based project goal and metrics management system. This video explains about the KPI Fire dashboard.

<https://www.youtube.com/watch?v=hPBunhw6IyQ>

I was involved in the system development using the MEAN stack, and D3.js.

- SmartBite | Angular Frontend /ASP.net Backend

<http://trysmartbite.com>

SmartBite is a food delivery service site that links restaurants, couriers, and customers to provide an efficient way to increase restaurant orders whilst also providing an effortless 1-step SMS order process for customers.

The front-end of the site is built with AngularJS and based on Twitter Bootstrap library.

- The Audience Awards | PHP, Laravel, MySQL, AWS

<http://theaudienceawards.com>

A Laravel based website where filmmakers upload short movie clips and the audience can vote for uploaded videos.

- Ecommerce | ASP.net, .NET framework, MSSQL, Azure

<https://www.naturalstacks.com>

Natural Stacks® is a market place dedicate to deliver all natural nutritional supplements with full transparency.

The site is built using Shopify platform with modern technologies and libraries including jQuery, Liquid, HTML5, and CSS3.

- Match Million | CMS/WordPress (Development)

A social and dating website which is based on WordPress/BuddyPress. Rich bachelors from America can meet beautiful girls from Eastern Europe.

- LikeToGet | iOS/Android (React Native)

LikeToGet is a social shopping app which is based on Instagram. Users can log in to the app via Instagram account and promote their products through Instagram via this app. Anyone who likes this post on Instagram will be redirected to the checkout page of the product.
