Name: Oleg Melnyk
Age: 37

E-mail: o.seoking@gmail.com

Skills:
- Python
- PostgreSQL
- OOP
- Django
- Git / Github

Web Scraping:
- Requests
- BeautifulSoup
- Selenium
- Scrapy
- Undetected Chromedriver
- Authorization bypass
- Rotating ips
- CAPTCHA bypass

Messengers Automation and Bots
- pywhatkit
- discord.py
- pyrogram
- telethon
- aiogram
- asyncio
- API

Libraries
- Pillow
- pywikibot
- wikipedia
- Tkinter
- Pygame
- Kivy
- xlsxwriter
- and many others

Other:

- Threading

- Multiprocessing
- AsyncIO

Amazon Web Services (AWS)
- S3
- RDS

Frontend:
- HTML 5
- CSS3
- Bootstrap
- JavaScript

Operating Systems:
- Linux
- NGINX
- Gunicorn
- Supervisor
- Windows

IDE:
- VSC
- PyCharm
- Sublime

Last Projects

https://www.tibrains.com/
Website contains 10 000 000 books and 3 000 000 authors
The books were scraped from different sources. I've done more than 20 scrapers.

https://rai.bz/
I'm working on this project at the moment. The project is dedicated to automating tasks in the field of SEO.

I also had a lot of experience in bot development and messengers automation
- Get members from competitors chat groups
- Send bulk messages and invites to messengers users
- Analyze messenger users info to find bot accounts, fake accounts, dead accounts and other ifo
- Getting content from competitors groups for analysis

Some examples of these you can also see at the website - **https://rai.bz/**
