Skills

Skill	Rating
Leadership	Excellent
Algorithms & Their Analysis	Excellent
Data Structures	Excellent
RESTful API Development	Very Good
Database Use and Management	Very Good

Projects

"RMN Auto Shop"
GitHub Repo: https://github.com/tish978/RMN_Auto

For my Advanced Database Management Graduate course at California State University - Fullerton, I created a full-stack web application which maintains database integrity. The application allows "employees" at a used Auto Shop to buy/sell cars from other dealerships or auctions, as well as other key functionalities a car dealership employee would need such as selling warranties or finding important contact information on car buyers/sellers.

Key Languages/Tools Used:
- Python
- FastAPI
- MySQL
- ORM
- HTML
- CSS

Work History

2021-04 - Current

Lead iOS Developer
Independent/Self-Employed
- Created iOS Game called "Ye Or Nay"
- Utilized Swift programming language, Firebase Authentication, various CocoaPods and APIs, and NoSQL database.

2019-06 - 2021-12

IAM Engineer
Protiviti , Boston, MA
- Worked with several client companies to help create a better IAM and Cybersecurity solution for themselves
- Experience utilizing third party APIs
- Wrote code in Java, BeanShell, and XML on daily basis

Prior Education

2015-08 - 2019-05

San Diego State University (SDSU)
- Bachelor's Degree in Computer Science in 4 years
- Executive Board positions within multiple organizations
